

UNABLE TO ADD DELEGATES OR SIGN

LOG Into the Evaluation Entry System. <https://evaluations.hrc.army.mil>

When you are on the main landing page, hit the F12 button on your keyboard

You should see a pop up appear from the bottom of your screen.

Look on the top row for Browser Mode and Document Mode it should read Internet Explorer 9 and Document Mode of 9.

If it is not showing IE9, click on the Document Mode and select IE9. Your screen will refresh and you will be able to add delegates.

In some instances, IE8 will work but will be slightly degraded.

If you encounter problems signing reports in Document Mode IE9, you may have to switch to a lower document mode- HRC is aware of the conflict and are working the issue.
