Lieutenant General Timothy J. Maude Complex (HRCoE)

- The Human Resource Center of Excellence complex is the largest single building project in Fort Knox’s history, totaling 883,180 square feet.
- The Human Resource Center of Excellence will house Army Accessions Command and Human Resources Command.
- The Human Resource Center of Excellence will be responsible for all Army Soldiers from their initial recruitment or ROTC through retirement and benefits beyond retirement.
- The Human Resource Center of Excellence has the capacity to accommodate upwards of 4,400 personnel.
- Construction costs for the HRCoE complex total about $192 million, according to the Louisville District, U.S. Army Corps of Engineers.
- The U.S. Army Human Resource Center of Excellence is an enterprise that integrates, coordinates, and synchronizes all human resource functions for the Army.
- The Human Resource Center of Excellence is scheduled to be functioning at 100 percent by fall 2010.
- The Human Resource Center of Excellence will receive the Leadership in Energy and Environmental Design (LEED) Silver rating for efficiencies in indoor environmental quality, building materials and resources, and energy and atmosphere. For example, all the wood used in the construction is harvested from forests that will be regenerated. The walls, windows and roofing will also retain cool air in the summer and warm air in the winter. The HVAC system designed and configured for future connection to a ground coupled geothermal water cooled system.
- The Human Resource Center of Excellence is one of the nine centers of excellence across the Army. For more information, see the “TRADOC Centers of Excellence” fact sheet.
- About 1,700 people worked on the HRCoE construction project. Of that number, 40 percent lived within a 50-mile radius, and 75 percent lived within a 100-mile radius.
- The HRCoE construction project is the largest Army contract managed by the Louisville District, U.S. Army Corps of Engineers. The district operates in a five-state area.
- Quick Facts:
  - 34 Acres of Asphalt
  - Parking for 3,765 Cars
  - 3,700 Tons of Structural Steel
  - 7.6 Acre Facility Footprint
  - 1.5 Miles of Corridors
  - 1,330 Windows
